

COMPLEMENTARY FEED FOR HORSES WITH SOME INGREDIENTS OF ANIMAL ORIGIN

1. Description

- White powder

2. Intended use

CAVALOR Colostra 24 is given to newborn foals as a replacement or supplement of colostrum milk from the mare (orphan foals or foals of mares with little or no colostrum of poor quality).

3. Directions of use

Dosage per animal per day

- To supplement the mare's shortage of colostrum milk : administer 100 grams of colostrum powder within 24 hours after birth to the foal.
- To replace the total lack of colostrum: administer 100 grams of Cavalor Colostra 24 within 6 hours after birth and repeat this administration after 12-16 hours.

Put 100 grams Cavalor Colostra 24 into 1 to 1,5 litres of milk replacer (Cavalor Hyppolac) or water. Stir well until the powder is completely dissolved. Serve at a temperature of 36-37°C.

4. Storage & Packaging

- Jar 100 g
- Keep dry and at mediate temperatures of 5°C till 25°C in normal storage hangars.
- Keep out of reach of children
